☐ Continuation Sheet Attached

Brief Description of Argument to be Presented:

The citations to the Steele reference have no teaching or suggestion of “initiating a linked stream that is linked to the primary stream” as required by claim 1. As described in greater detail in concurrently filed Amendment, it appears that the initial sequence of thumbnails in Steele is discarded and a different set of thumbnails is substituted.

An Interview was conducted on the above-identified application on _____.

NOTE:

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This Application will not be delayed from issue because of applicant’s failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
